

Benefits of Innov'Pulse® helical AFO :

- A **dynamic** transmission, from the foot to the leg
- A **foot lifter** combined with an ankle **stabilizer**
- A custom-made, **flexible** and **lightweight** equipment thanks to the **carbon** material
- A possible **specific support** of the foot arch
- A convincing **impulse** effect, linked to its **helical** shape

An orthosis

An Ankle Foot Orthosis is a removable device that search by different means :

- to correct a deficient function or,
- to compensate for a patient's inability to move or,
- to increase the physiological performance of walking and running.

There are different ankle foot orthoses on the market. Some existing orthoses stabilize the ankle, others raise the foot ...

... innovante.

The Innov'Pulse® orthosis combines the advantages of existing orthoses and additionally provides flexion-extension of the ankle.

The Innov'Pulse® orthosis is the subject of an international patent and a registered model.
